## About Us

**Dharti Agri Export** is based in Junagadh district, Gujarat (India), a region globally known as the heart of peanut cultivation. This is not just our location; it is our greatest strength.

For over 30 years, we have worked closely with local farmers in and around Junagadh, understanding soil, seasons, and varieties at ground level.

Being located at the source allows us to select the right raw peanuts at the right time before the season even begins.

### **Our operations are built around two dedicated facilities:**

**Domestic Market Facility:** This unit caters exclusively to the domestic market, processing peanuts according to local consumption standards and market requirements.

**Export Market Facility:** This unit is designed solely for exports, where peanuts are processed under stricter controls to meet international quality, safety, and buyer-specific specifications.

With an annual processing capacity of 40,000 MTS, our state-of-the-art facility is strategically located near the **Gir sanctuary**, one of India's purest and most pollution-free natural regions. Surrounded by nature, our plant operates in a clean and calm environment that reflects our deep respect for sustainability. The entire factory is powered by 100% green energy, ensuring that our operations leave no environmental footprint. Equipped with fully automated, high-tech machinery and designed for maximum hygiene, every process strictly follows international food safety and quality protocols. Here, advanced technology, nature, and responsibility come together to deliver food products that are pure, safe, and globally trusted.

### **Procurement & Processing:**

We procure peanuts primarily from local farmers. Based on customer requirements, raw material is carefully selected and processed separately for domestic and international markets, ensuring the right quality reaches the right destination.

From cleaning and grading to sorting and export packing, everything is handled in-house with strict quality discipline.

**Importers often worry about quality. With us, that worry ends. Every shipment reflects the care, consistency, and standards we promise.**

Keeping processing close to the farms helps us protect the natural quality that the crop is born with.

This close connection between farmers and processing is what makes our peanuts stand out — cleaner, more uniform, and reliable across shipments.

## Our Mission

Our mission is to transform origin advantage into consistent quality.

When sourcing begins with farmers and processing stays under one roof, quality is built step by step, not adjusted later. We focus on stable specifications, careful handling, and realistic timelines, so buyers receive exactly what was agreed, shipment after shipment. We don't believe in buying and selling; we believe in processing with responsibility and delivering with discipline.

## Our Vision

Our vision is to be recognized as a benchmark peanut processor from India, rooted in Junagadh and trusted worldwide. We aim to build a company where buyers value not just the product, but the origin, process, and reliability behind it. By strengthening farmer partnerships, upgrading processing systems, and staying transparent in our operations, we want our peanuts to be known for predictable quality and dependable supply.

**Our long-term goal is simple: when buyers think of Indian peanuts, they think of Dharti Agri Export.**

## **In-Shell Peanuts**

**Peanuts in its natural form with thick yellowish outer shell and kernels inside**

**Harvest Season : October / November**

**Counts Per Ounce : 20-24,24-28,28-32**

**Origin : India**

## **Bold Peanuts**

**Sometimes also identified as Virginia or Runner varieties. They are characterized by their reddish colour, large sized peanuts skin with elongated shape.**

**Harvest Season : October / November**

**Counts Per Ounce : 35-40,38-42,40-50,50-60,60-70**

**Origin : India**

## **Java / TJ Peanuts**

**Sometimes also identified as Spanish Variety.**

**They are characterized by their Pinkish Colour Skin with Spheroidal Shape**

**Harvest Season : April/May and October / November**

**Counts Per Ounce : 50-60,60-70,70-80,80-90,90-100**

**Origin : India**

## Roasted Whole Peanuts

Peanuts are roasted and their outer skin is removed to produce blanched peanuts, widely used in snacks, confectionery, sweets etc.

Counts Per Ounce : 38-42,40-50,50-60,60-70

Roasting : Low, Medium & High degree of Roasting if needed

Origin : India

## Roasted Split Peanuts

Split peanuts are obtained by splitting whole peanuts into two halves, and are commonly used in making snacks, confectionery, sweets etc.

Counts Per ounce : 38-42,40-50,50-60,60-70

Roasting : Low, Medium & High degree of Roasting if needed

Origin : India

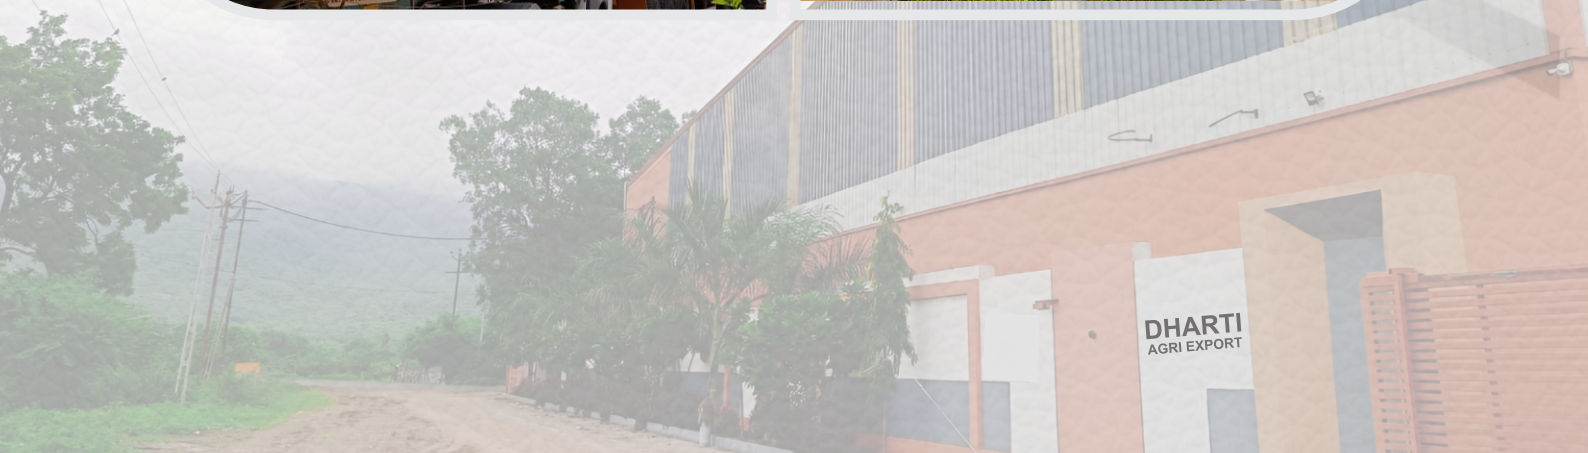

## Other Products : Spices & Oil Seeds

We are dealing in all seasoning spices and Oil Seeds

Spices : Fennel Seeds, Cumin Seeds, Coriander, Fenugreek, Chilli, Turmeric Finger, Cloves, Dill Seeds, Black Cumin, Ajwain Seeds

Oil Seeds : Sesame Seeds, Flax Seeds, Mustard Seeds

Origin : India

## PROCESS

Good Manufacturing Practice (GMP) is strictly implemented in our Processing unit. The info-graphic below represents the different steps involved in processing peanuts at our units.
